ANNUAL LARKSPUR, Stock Flowered

Vaughan's Giant Pansies

SWISS GIANT MIXTURE

The flowers of this new strain are of enormous size, three inches and over in diameter, they are perfectly round with overlapping petals, borne on strong stalks well above the remarkably luxuriant foliage. The most striking qualities of this strain, however, are the wonderful colors and color combinations—very rare and entirely new—never before seen in Pansies, salmons, pinks, reds. All flowers are 3 or 5 blotched. There are no self colors such as white, yellow and blue in this mixture. We recommend this strain unreservedly. Trade pkt., \$1.00; 1/8 oz., \$2.50; 1/4 oz., \$4.50; oz., \$16.00.

VAUGHAN'S INTERNATIONAL MIXTURE

This is a mixture of special strains such as Bugnot, Masterpiece, Swiss Giants, Triumph of the Giants, Mammoth Exhibition, Non Plus Ultra, Giant Cassier—all 3 and 5 spotted flowers of largest size and great substance in the most varied colors and color combinations. When well grown the plants of this mixture should sell readily at a dollar a dozen. Since this mixture contains but very few self-colors, such as white, blue and yellow, these should be ordered separately if desired. Trade Pkt., 50c; 1/8 oz., \$1.25; 1/2 oz., \$4.00; 1 oz., \$8.00; 1 lb., \$100.00.

VAUGHAN'S GIANT MIXTURE

Besides a good share of the "Fancy" strains such as Masterpiece, Bugnot, Cassier, etc., this mixture contains all the self colors such as white, yellow, blue, purple, red, bronze, etc., and is probably the best "general" high grade mixture obtainable. All the flowers are of the "Giant" type and of good shape and texture. Trade pkt., 50c; 1/8 oz., 75c; oz., \$5.00; 1/4 lb., \$18.00.

NEW EARLY FLOWERING GIANT PANSIES (Hiemalis)

This new strain produces its giant flowers about four weeks earlier than other known types. In March, when the old type pansies hardly show any buds, the plants of the new strain bore from 3 to 5 of their giant flowers.

Ornamental Pomegranate

A New Christmas Plant

The seed germinates very slowly and irregularly, and real good plants are not obtainable if sown late. We suggest to our customers to make a sowing in July or August and we feel that better results will be obtained.

The seedlings should not be pricked off into 2-inch pots until they show character leaves.

Next spring as soon as the weather warms up sufficiently, they could be shifted to cold frames in the full rays of the sun and brought back into a forcing temperature about the last week in August and "forced" in a temperature of 60 to 65 degrees for the Christmas trade.

200 seeds, \$1.00; 1,000 seeds, \$4.50.

The Economical Seeder

A handy little tool which will be found useful and economical in sowing all fine seeds. It is made of zinc and measures 4¾ inches over all.

The instrument is small enough to be held in the palm of the hand and the amount of seed is controlled by a simple action of the thumb operating a slide regulating the flow of the seed. It has a capacity of one ounce of aster seed and more or less of other seed according to size. It is especially recommended for sowing finer flower seeds such as begonia, calceolaria, cineraria, by florists, and all the smaller vegetable and flower seeds in the garden.

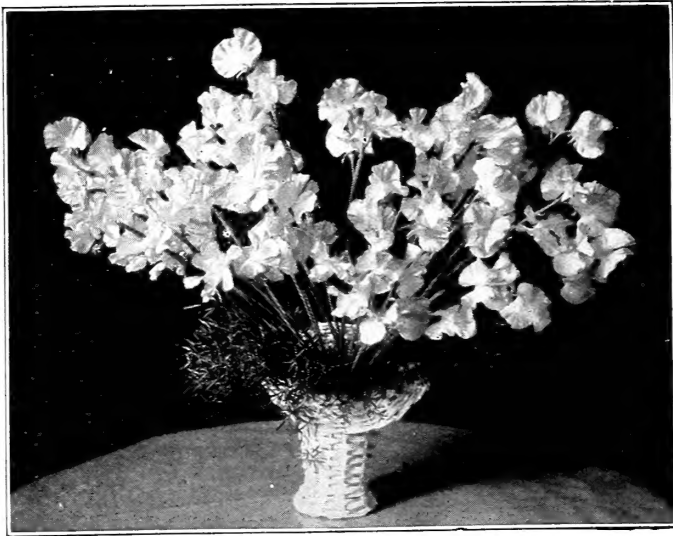

Each, 50c

MORSE'S SUPERIOR PINK

A GRAND NEW PINK SWEET PEA

Morse's Superior Pink

The color is a beautiful clear rose pink, very slightly shaded with salmon. This salmon shading gives more life to the color in the daytime and under artificial light is most outstanding.

The variety is a strong grower but not coarse in vine. Flowers grown in New York state last winter measured 2½ inches across the standard without being flattened out and stems averaged 18½ inches in length. When well grown four magnificent blossoms to each stem is the rule. This outstanding novelty was awarded a Silver Medal at the International Flower Show, March 16, 1926. A Certificate of Merit by Chicago Florist Club, Chicago, on May 13, 1926. Originator stock. Price oz., \$1.20; ¼ lb., \$4.50; lb., \$15.00.

Mrs. Calvin Coolidge. A bright salmon pink with a suffusion of bronzy orange. Pkt. 20 seeds, 25c.

Seeds of Biennials and Hardy Perennials

Many of the biennials and perennials are now as important to florists as Asters, Sweet Peas, Verbenas, etc., are among the annuals. Some can be forced, such as Delphinium, Canterbury Bells, etc., while many others sell as readily as Geraniums if grown

in pots, not to speak of the cut flower sorts, such as Coreopsis, Gypsophila, Chrysanthemum, Shasta Daisy, Physostegia, etc. They are really needed in every florist's establishment that caters to the better class of trade. The demand for them is increasing.

We had remarkable success with the *Primula Obconica* seed obtained from you last year, and sincerely hope you will be in a position to give us seed of the same high quality as we then obtained. The strain was extremely true to type and of very fine quality and the largest flowers we have ever had in the *Obconicas*. A. M. TERRILL, Ltd., 9th Ave. and 16th St. F.

Sell Darwin Tulips from This Compact, Beautiful Display

WITH tulip bulbs lowest in price since the world war, the demand is sure to be great. And here is a display box which makes it possible to show the bulbs attractively, in small counter space, with no trouble at all to keep in order.

Vaughan's bulbs are nationally known for their quality. No other assurance of your merchandise is needed than to say it comes from Vaughan's Seed Store. The ten compartment display box staunchly made of 100 point cardboard printed in brilliant colors, will hold 500 bulbs, 50 each of ten varieties.

This beautiful display box, with 500 Darwin tulips, 50 each of ten named varieties, separately bagged, \$10.00 f. o. b. Chicago or New York.

The varieties in this collection are the most popular we know including. Tonnaye, Clara Butt, Farncombe Sanders, Inglescombe Yellow and others of like quality. You retail them for 50 cents per dozen, and your profit equals your investment. After the display box and first collection have been bought, refill orders will be accepted for \$9.00 for 500 bulbs, 10 each of the same varieties, in bags of 50; or \$17.50 for 1,000 bulbs, 100 each of the same ten varieties, 50 in the bag. As each compartment in the box holds easily 50 bulbs, it is convenient to transfer the entire bag-full to the proper bin when the latter is empty. This prevents mixtures and loss of bulbs.

Counter Space Needed, 13x29 Inches.

The display box with its garden design printed in brilliant colors, occupies very little space on your counter. It is an ornament to any store; and will not be out of place in the finest flower shop. Its colors are cream and bright blue with scarlet blossoms; it will harmonize with any color scheme. It solves the problem of offering bulbs for sale in the retail shop, without danger of mixing varieties, and losing stock. A big, sure profit, and added sales are certain for anyone who takes advantage of this offer.

Field of Vaughan's Purity Freesias

Vaughan's Freesias California Grown

What we stated in last year's catalog regarding **Freesias** taking the place left open by the **Paper White** Narcissus embargo proved correct.

Those growers who planted a good supply of these bulbs, owning them at **very low prices**, have made good profits, and are again **booking** their orders this season in quantity for shipment during July, August and September.

They know they grow easily, that the flowers can be used in many ways, and with prices of Paper Whites about the same as last year, good profits can again be expected.

Be careful, however, not to compare **our prices** with those who might be offering **discolored** bulbs and the **ordinary Refracta Alba** or "tissue paper" variety. They are worthless.

In addition to Purity Freesias we offer named colored sorts, hybridized by the eminent grower, Mr. A. Frey, of California.

Order now and make sure of your supply

BULBS for Mid-Summer and EARLY FALL

Examining *Lilium Harrisii* Fields

True *Lilium Harrisii*

Vaughan's special strain of *Lilium Harrisii* is grown for us on the Bermuda Islands by one of the most reliable growers, and under the supervision of the British Government Horticultural Inspectors. Each year hundreds of thousands of flowers are taken off of the plants after they have fully opened in order to admit light and air to the lower section of the plants, thereby preventing blight and materially aiding the development of the bulbs. Numerous fields of other growers in the same and nearby section contain a very high percentage of lilies **not true type**. These are known to the growers as **Hybrids**, and are really a cross between the Longiflorum and the *Harrisii*. They grow much shorter, have a broad foliage, bloom about two weeks later, and carry less flowers per bulb than the **true *Harrisii***. This makes them undesirable for early forcing.

Do not allow the matter of **price to interfere** when buying this stock. Remember **Hybrid stock** can be bought **cheap**.

We can place in cold storage for a few weeks if desired.

Let Vaughan's Protect You on Your Fall Bulb Requirements

By placing your orders now (at open prices) it enables us to send to our foreign representatives your order, thus they take advantage of field prices which are invariably lower than at Green Auctions, also helps us to figure more closely our requirements, and with less surplus risk we can make our prices much lower than we can to those who wait until shipping time.

Selling you cases and packing Free F. O. B. New York, Chicago, Seattle, and San Francisco. This eliminates all "Special Expenses," "Excess Brokers' Fees" and "Port Charges," in which nearly every U. S. florist-grower has been persistently robbed for years.

In buying Hyacinths from us you buy them by measure in "centimeters." This means much, as against those people who sell "Firsts," "Seconds" or "Thirds" and give you no assurance as to what such grades measure.

Further, you get our fifty years of experience of supplying the most critical Florist and Private Trade with forcing bulbs

LET YOUR BULB CARES BE OURS

White Calla Ready in September

(*Aethiopica*)

These can be grown at less expense during the winter months, requiring less heat than other lilies.

Callas being natives of swampy regions grow to best advantage where there is an abundance of moisture, and are therefore very difficult to handle in the curing. Some growers practice **premature cutting off the tops**, expose bulbs to the sun, in order to make **early shipment**. This is very dangerous and will cause dry rot.

We therefore take great pains in **securing our stock from growers** in California who do not use this practice. Our stock is **thoroughly cured in the ground** and dried thoroughly before they are packed. This, of course, means **later delivery** but better results can be obtained from such bulbs.

We caution forcers of Callas to water this stock sparingly after planting because Calla bulbs store up considerable moisture.

IRIS

Filifolia "Imperator." Brilliant Blue. Large flowers on long stems. Per 100, \$4.50; per 1000, \$40.00.

Tingitana. Lilac-purple. Per 100, \$8.00; per 1000, \$75.00.

ANEMONES

One of the most showy flowers, good for cut flowers. They thrive in any soil except a very heavy clay. Soak the bulbs in water a few hours before planting. Set 6 inches apart about 2 inches deep. Sunny location, plenty of moisture. **Mixed**, per 100, \$4.00; per 1000, \$35.00.

RANUNCULUS

A florist's favorite when same becomes known. Bulbs are claw-like shaped and should be planted with claws downward two inches deep and six inches apart. Ordinary garden soil is satisfactory. Soak bulbs same as Anemones. **Mixed**, per 100, \$4.00; per 1000, \$35.00.

RANUNCULUS

Hardy German Iris

"S" refers to the three standard or upright curling petals. "F" refers to the three falls or drooping petals.

The figures preceding the varieties are the rating given to them by the American Iris Society, 10 being the highest rating used in the judging.
